

How to Get Google & Facebook API Keys for Social Login

Follow these step-by-step instructions to create your developer credentials and send them to your web developer.

PART 1: Google OAuth Login (Google Client ID & Secret)

Google login allows customers to sign in instantly using their Gmail / Google accounts.

Step 1: Open Google Cloud Console	Go to https://console.cloud.google.com and sign in with your business Google / Gmail account.
Step 2: Create a New Project	Click the project dropdown in the top bar -> Click New Project -> Enter Project Name: <i>JOYA Jewelry Store</i> -> Click Create .
Step 3: Configure OAuth Consent Screen	From the left menu, go to APIs & Services -> OAuth consent screen . • Select User Type: External -> Click Create. • Enter App Name: <i>JOYA Jewelry</i>, User Support Email, and Developer Email. • Click Save and Continue through all steps.
Step 4: Create OAuth Client ID	Go to Credentials -> Click + CREATE CREDENTIALS -> Select OAuth client ID . • Application type: Web application • Name: <i>JOYA Web Store</i> • Authorized JavaScript origins: Add https://your-domain.com • Authorized redirect URIs: Add https://your-domain.com/login • Click Create.
Step 5: Copy Your Google Keys	A popup will display your credentials. Copy these two values: 1. Client ID (e.g., <i>123456789-xyz.apps.googleusercontent.com</i>) 2. Client Secret

PART 2: Facebook Login (Meta App ID & Secret)

Facebook login allows customers to sign in with 1-click using their Facebook profile.

Step 1: Open Meta Developers	Go to https://developers.facebook.com and log in with your Facebook account.
Step 2: Create a Meta App	Click My Apps (top right) -> Click Create App . • Select use case: <i>Authenticate and request data from users with Facebook Login</i> -> Click Next. • App Type: <i>Web</i>. • App Name: <i>JOYA Jewelry</i> -> Click Create App.
Step 3: Get App ID & App Secret	In your App Dashboard, go to App Settings -> Basic . • Copy App ID (e.g., <i>987654321012345</i>) • Click Show and Copy App Secret. • Add your Privacy Policy URL and Terms URL.

Step 4: Configure Facebook Login

Under Products, select **Facebook Login** -> **Settings**.

- Valid OAuth Redirect URIs: Add `https://your-domain.com/login`
- Toggle App Mode at top bar from *Development* to **Live**.

SEND THIS COMPLETED CHECKLIST TO YOUR DEVELOPER:
